Quick-locking circular connectors M23 PRO circular series simplifies connection for signal and power transmission

Middletown, Pa. – The new M23 PRO circular connectors from Phoenix Contact offer uniform solutions for signal and power transmission. The patented ONECLICK quick-locking system makes it easy to connect devices quickly and safely.

With the ONECLICK system, the user can see, hear, and feel when the connection is made, ensuring that connectors are fully locked. The connectors, available in M23 up to 17 positions, are compatible with threaded and quick-locking metric connectors from other manufacturers.

The cable connectors have a vibration spring, making them vibration-resistant up to 20g. They are rated for IP66/68. To learn more, visit www.phoenixcontact.com/MPRO.

About Phoenix Contact

Phoenix Contact develops and manufactures industrial electrical and electronic technology products that power, protect, connect, and automate systems and equipment for a wide range of industries.
