Comprehensive solution for your control cabinet: Complete line

(04/19) Phoenix Contact now supplies a complete solution to optimize all of the processes during control cabinet manufacturing: Complete line is a system comprising technologically leading and coordinated hardware and software products, consulting services, and system solutions.

The optimized interactions simplify all of the work processes from engineering through to procurement, installation, and operation.

The comprehensive portfolio comprises products for all of the tasks in the control cabinet: connection, switching, disconnection, as well as measuring, controlling, supply, and automation. Complete line has the right solution for every function. The simple and intuitive operation ensures that time is saved during the assembly, commissioning, and maintenance of control cabinets.

The coordination of all of the products in the Complete line system with regard to design and accessories ensures that parts can be used universally thus reducing the logistic costs. The Project complete planning and marking software supports the entire process of control cabinet manufacturing. It also enables the individual planning, automatic checking, and direct ordering of terminal strips.
