

Surge protection reinvented

The product range for the protection of power supply systems

The product range for the protection of power supply systems

Lightning currents and surge voltages cause damage to devices and components. In the worst case scenario, the system could even fail.

Our surge protective devices ensure that your systems continue to work without interruption. Even in the most lightning-struck location in the world, the Safe Energy Control range provides decades-long protection. A backup-fuse-free application and the uniform, compact design enable the efficient and easy planning of your control cabinets.

Simply type the web code into the search field on our website.

One product range for every application

Select products in accordance with your individual requirements.

Protection for life

Install and forget: our surge protective devices provide decades-long protection in the most lightning-struck location in the world.

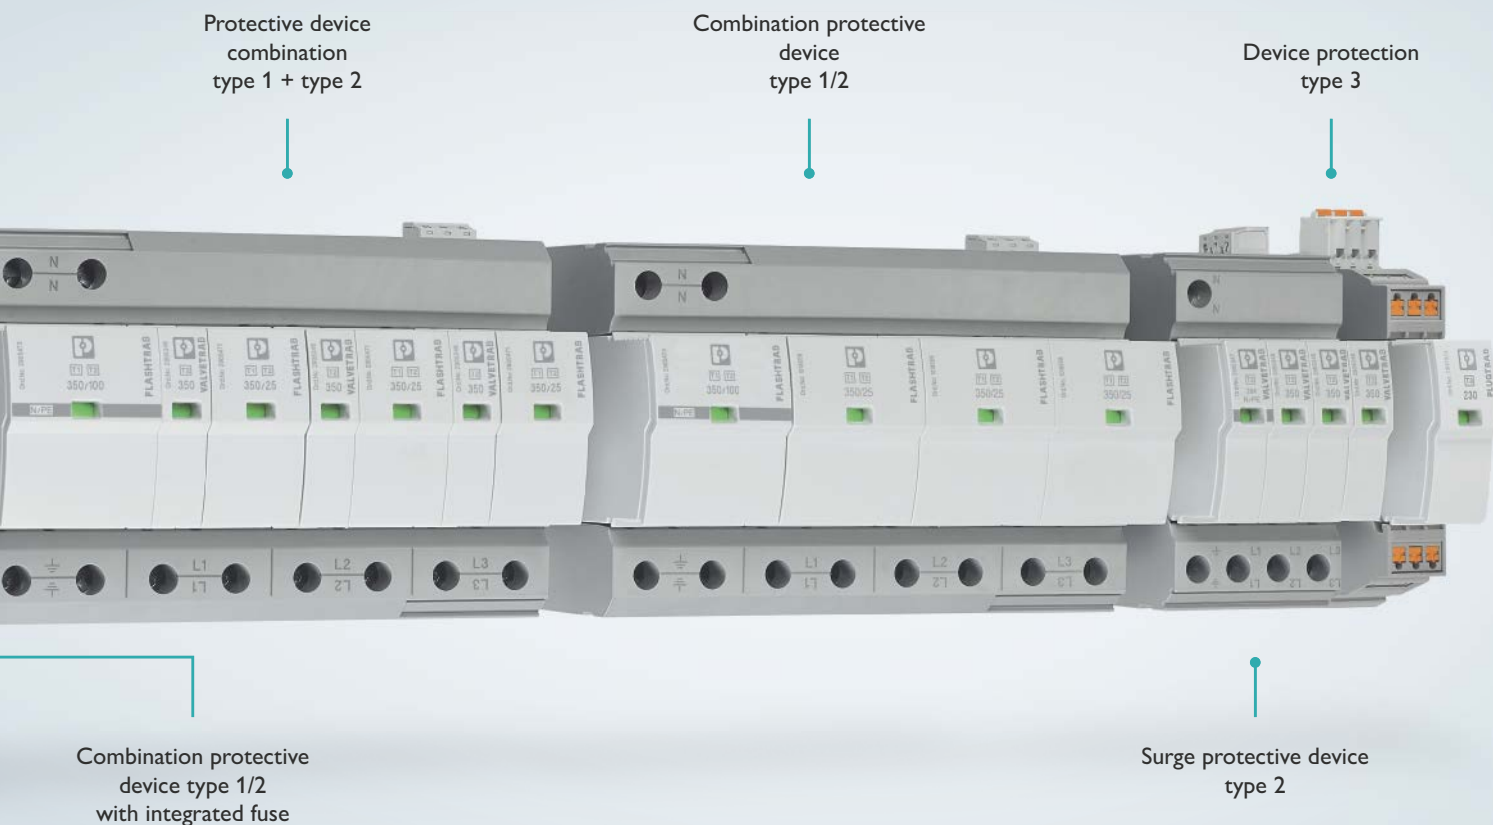

Uninterrupted protection

Ensure uninterrupted system operation through the use of revolutionary spark gaps and products with safe disconnect devices.

Efficiency in control cabinet manufacturing

Plan your control cabinets more efficiently and easily, thanks to compact surge protective devices for backup-fuse-free applications.

Protective device combination type 1 + type 2

Combination protective device type 1/2

Device protection type 3

Combination protective device type 1/2 with integrated fuse

Surge protective device type 2

Certification without exception

Utilize international certifications for worldwide use in demanding ambient conditions.

Status indicator and remote signaling

Use the integrated status indicator and simple remote signaling system to detect overloaded surge protective devices.

Testing for standard conformity

Use the CHECKMASTER 2 to test and document the condition of pluggable surge protection modules.

In dialog with customers and partners worldwide

Phoenix Contact is a globally present, Germany-based market leader. Our group is synonym for future-oriented components, systems, and solutions in the fields of electrical engineering, electronics, and automation. A global network across more than 100 countries, and 16,500 employees ensure a close proximity to our customers, which we believe is particularly important.

The wide variety of our innovative products makes it easy for our customers to find future-oriented solutions for different applications and industries. We especially focus on the fields of energy, infrastructure, process and factory automation.
