

Phoenix Contact Group

Phoenix Contact is the worldwide market leader of components, systems and solutions in the area of electrical engineering, electronics and automation. Today, the family-owned company employs 17,400 people worldwide and had a turnover of 2.38 billion euros in 2018. The corporate headquarters is located in Blomberg in Germany. The Phoenix Contact Group has fourteen companies in Germany as well as more than 55 sales subsidiaries. In addition, the worldwide presence is consolidated by 40 representations in Europe and Overseas.

Phoenix Contact produces with a high vertical range of manufacture in 11 countries all over the world. The product range comprises components and system solutions for energy supply including wind and solar, device and machine building as well as control cabinet engineering. A diverse product range of modular terminal blocks and special-purpose terminals, printed circuit terminal blocks and plug connectors, cable connection technology and installation accessories offers innovative components. Electronic interfaces and power supplies, automation systems on the basis of Ethernet and wireless, safety solutions for man, machine and data, surge protection systems as well as software programs and tools provide installers and operators of systems as well as device manufacturers with comprehensive systems. The automotive, renewable energy and infrastructure markets are supported with holistic solution concepts including engineering and training services and further service features according to their specific demands.

Phoenix Contact supports the digital transformation with products, systems and solutions. Based on the experience in the in-house machine building, the company knows the requirements of the digitalization and integrated data flow from the engineering through the production and furthermore along the whole product life cycle.

Product innovations and specific solutions for individual customer requests are developed at the locations in Germany, China and the United States. Numerous patents underline the fact that many developments of Phoenix Contact are unique in their own. In close cooperation with universities and science, future technologies like e-mobility and the digitalization are explored and integrated into products, systems and solutions for the market.
