PHOENIX CONTACT

DIALOGUE DAYS

INSPIRING INNOVATIONS

The fair of the future is virtual

Phoenix Contact is launching - **PHOENIX CONTACT Dialogue Days** - a virtual conference to update you on our latest innovations, technologies, trends and solutions. We will also offer you the opportunity to participate in a dialogue (via live chat) to discuss the conference topics in more detail.

Dialogue Days Conference:

Central European Summer Time (EST + 6hrs)

April 27 - 29, 2020 - Including Live-Chat

We are inviting you to attend a three-day virtual conference made up of a large number of presentations, interviews, and expert round tables. Afterwards, you can still visit our digital exhibition until May 8, 2020.

Digital Exhibition: (Live 24hrs / Virtual)

April 27 - May 8, 2020 - Including Live-Chat

Visit our digital exhibition with topics that include: mobility – digitalization of building automation – industrial communication process optimization in control cabinet manufacturing – safety of machinery – cybersecurity – solutions for innovative power supply – Innovative connectivity for device manufacturers – and much more.

Live-Chat will allow you the opportunity to get in touch with us directly. Ask us your questions and share your ideas with us. We will find a solution together. **#stayincontact**

AGENDA

These will be live-streams which will all be available, on demand, after the live streaming

27. APRIL MONDAY

- 9:00 **Opening speech of the C-Level**
- 9:15 **Empowering the All Electric Society**
Keynote: Tomorrow's world requires sustainable management for sustainable growth
- 10:00 **How SPE relates to TSN and why 5G does not save the world alone**
Overview of new technologies in industrial communication
- 11:00 **Electromobility suitable for everyday use**
How innovations, trends and technological know-how pave the way
- 13:00 **COMPLETE line – The comprehensive solution for control cabinet building**
Standardization as the key to process optimization in control cabinet building
- 14:00 **Efficiency and flexibility as the most urgent requirement**
PLCnext Technology, the open ecosystem for automation
- 15:00 **Board-to-board connectors**
Connectivity for all dimensions
Robust board-to-board connectors from the FINEPITCH series

28. APRIL TUESDAY

- 9:00 **Future-oriented signal conditioning solutions for digital and analog signals**
Switch signals and loads cleverly – distribute them intelligently - measure and monitor smart
- 10:00 **Your way into a smart world**
The digital transformation changes the world. Everything is interconnected
- 11:00 **Single Pair Ethernet**
Ethernet finally goes the distance – Connectors for Single Pair Ethernet
- 13:00 **(Cyber) Security first!**
How IEC 62443 can help you improve your company's cyber security
- 14:00 **Trend topic: DC charging in the lower power range**
Economical CCS charging cables for home, gastronomy and retail
- 15:00 **Efficiency Driver Digital Data**
From the digital circuit diagram to the real switch cabinet
- 16:00 **Combustion engine in the power supply – does that make sense?**
Thinking out of the Box für mehr Innovation

29. APRIL WEDNESDAY

- 9:00 **Fit for Safety - Mastering Global Trends in Machine Safety**
Neue Anforderungen für Performance-Level und SIL
- 10:00 **Fiber optic connection solutions**
High density in a robust package – M17 MPO series FO data connectors
- 11:00 **Scalable solutions for control cabinet building**
Optimized processes through assistance systems
- 13:00 **Optimum shielding for highest plant availability**
Reliably protected from the field to the control cabinet
- 14:00 **Building Intelligence – The digitalization of building automation**
Intelligent buildings for urban concepts of the future
- 15:00 **Intelligent charging infrastructure**
Clever charging with grid and building integration
- 16:00 **Electronics housings and services**
Optimum design of your device, thanks to a comprehensive range of housing and connection technology

All sessions above will live stream in Central European Summer Time (EST + 6hrs)

Topics that will be exhibited at the fair

Trends and Technologies

All Electric Society
New Communication Technologies

Solutions and Applications

Solutions for Energy
Solutions for Factory Automation
Solutions for Infrastructure
Solutions for Process Industry
Solutions for E-Mobility
Solutions for Control Cabinet

Innovations for the Smart World

Open Ecosystems for Automation - PLCnext Technology
Connectivity for device manufacturers
Connectivity for field cabling
Connectivity for control cabinets
Signal conditioning
Load switching
Safety
Power Reliability
Industrial networks and Security
Tools and marking "Shopfloor"

Let's meet up - digital!

Register here.

<https://phoe.co/DialogDays>

What is the format like? Is it going to be live-stream directly from Germany, and if so, is there any recordings done afterwards due to there being a time zone difference?

All live streams will be available to you on-demand once the live streaming has completed.

#stayincontact
